

Build Your Own Bird Box

Scolton Manor Station Shop are now offering a Build Your Own Bird Box activity for local schools.

The educational activity is suitable for KS2 children and can be provided as either a standalone activity or included in part of a wider visit to Scolton Manor.

Each session costs £4 per child, lasts for 30 minutes and is suitable for up to six children at a time. All materials are provided and adult supervision (and assistance) is required at all times. Self-led bird spotter activities can be provided for those children not currently building their bird box.

The activity is a great opportunity to learn about woodworking and local wildlife. Additionally, as Station Shop staff comprise of individuals with various disabilities the children are able to learn about integration in a positive atmosphere.

All Build Your Own Bird Box sessions need to be booked in advance.
